\*The above mentioned values are in accordance with the legislation in effect at the date of the release of this safety data sheet.

**8.2 Exposure controls**

**Engineering measures**

Maintain air concentrations below occupational exposure standards.  
Ensure adequate ventilation, especially in confined areas.

**Personal protective equipment**

- Eye/face protection : Safety glasses with side-shields conforming to EN166  
Eye wash bottle with pure water
- Hand protection : Chemical-resistant, impervious gloves complying with an approved standard must be worn at all times when handling chemical products. Reference number EN 374. Follow manu-

facturer specifications.

Recommended: Butyl rubber/nitrile rubber gloves.  
Contaminated gloves should be removed.

Skin and body protection : Dust impervious protective suit

long-sleeved working clothing, long trousers). Rubber aprons  
and protective boots are additionally recommended for mixing  
and stirring work.

Respiratory protection : In case of inadequate ventilation wear respiratory protection.  
Respirator selection must be based on known or anticipated  
exposure levels, the hazards of the product and the safe work-  
ing limits of the selected respirator.  
particulate filter P  
P1: Inert material; P2, P3: hazardous substances  
Ensure adequate ventilation. This can be achieved by local  
exhaust extraction or by general ventilation. (EN 689 - Meth-  
ods for determining inhalation exposure). This applies in par-  
ticular to the mixing / stirring area. In case this is not sufficient  
to keep the concentrations under the occupational exposure  
limits then respiration protection measures must be used.
